

# Power Smart New Homes

---

## Looking for a new home? Consider a Power Smart New Home

When you buy a Power Smart home, you'll enjoy greater comfort, lower energy costs and less impact on the environment.

Our Power Smart New Home Program encourages builders and developers to [incorporate energy-efficient design](#) at construction, which is the most cost-effective way to save energy in the home. Each home features a [Power Smart label for New Houses](#) label.

To achieve a Power Smart Gold label, the house must achieve at least EnerGuide 80, which indicates that it is an energy-efficient new house. A Power Smart Gold labelled home uses 30% less energy than an average home in the market.

When buying a new home, look for the Power Smart label.

Customers who purchase a Power Smart home may be eligible for a 10% refund on their mortgage loan insurance from the [Canada Mortgage and Housing Corporation \(CMHC\)](#).

Looking for a Power Smart home? Check out these [feature developments](#).

## Where can you find a Power Smart New Home?

When you buy a Power Smart home, you'll enjoy greater comfort, lower energy costs and less impact on the environment. Check out these [Power Smart labelled-developments](#) or attend an open house.
